

Postdoctoral position at University of Zaragoza

Department of Theoretical Physics and Institute of Biocomputation and Physics of Complex Systems

The Ministry of Science and Innovation (MICINN) will announce in February 2011 the program "Juan de la Cierva" for postdoctoral positions in Spanish institutions.

Basic features of the contracts:

- 3 years contract
- Year salary 25.000 € approx. (brute)

Basic Requirements:

- Hold PhD degree
- Ph D should be obtained not before September 1, 2007.

Procedure:

Candidates are selected directly by the MICINN, however, each application must be supported by an academic institution (University of Zaragoza in this case). The list of successful applications will be published in July, 2011 (starting date between September 2011 and February, 2012).

It is highly recommendable to have one or two years of postdoctoral experience to increase the possibilities of being selected by the MICINN.

Deadline: **February 3, 2011**

Candidates interested in the fields of electron transport phenomena in mesoscopic and nanoscopic systems (theory), random matrix theory and applications, quantum information, chaotic scattering, disordered systems, etc, please contact (attach CV and contact information for references)
